<u>~ 2 ~</u>

The following transfers were probably effected in connection with the assembly of air units in the battle area; Ground attack regiments from Brandenburg-Friest and Brandenburg-Arado, and probably one fighter regiment from Grossenhain to Infurt-Findersleben eigfield: Ground attack regiment from Alt-Loennewitz to Schkeuditz near Leipzig and elements of this regiment possibly to Nerseburg; Possibly the ground attack regiment from Finstervelde to Altenburg airfield, as ground attack aircraft were observed at this field. Since the number of aircraft and air activity at Welzow, Brand and Grossenbain airfields decreased considerably during the period of the maneuvers, it is assumed that the fighter regiments from these airfields were transferred to other a rfields for the maneuver. The aircraft were protably transferred to Erfurt-Bindersleben, Altenburg and Koethen airfields as an increased number of aircraft was observed at these fields. The fact that the units assembled in the Koethen-Francis-Altenburg area as well as in the Erfurt-Findersleten area may indicate that the air force

units were organized into an eastern group and a western group during the maneuver; while the attacking army units probably moved from the Ilm Fiver

south of Weimar toward the west into the area around Arnstadt.
